SERVICES PORTFOLIO

Scientific and business services

A Puerto Rico-based consulting and venture studio helps organizations plan, build, and operate science and technology initiatives through strategic advice, digital systems, financial data workflows, research, market intelligence, and specialized assurance.

CORE COMPETENCIES

01

Venture strategy and commercial development

Business planning, organizational and opportunity assessment, proposal and funding support, strategic partnerships, enterprise opportunities, and intellectual property discussions.

02

Digital infrastructure and financial operations

Managed domains, DNS, business email, websites, digital workspaces, applications, workflow systems, financial data reconciliation, and reporting controls.

03

Market intelligence, data science, and AI

Market and company research, technology sector analysis, organizational risk assessment, data curation and annotation, and AI or machine learning workflow implementation.

04

Scientific research and AI assurance

Scientific programming, research analysis and communication, publication workflows, and adversarial evaluation of scientific models, research agents, and sensitive data systems.

IN THIS STATEMENT

01	**Managed digital infrastructure and service operations** A managed online foundation for small science, technology, consulting, and analytics teams.	Starting at $500 per month	Page 2
02	**Digital systems, applications, and automation** Connect software, workspaces, and automation around how the organization operates.	Scoped beyond the Base plan	Page 3
03	**Market intelligence and venture assessment** A sourced view of technology sectors, participants, and market movement.	Inquire for pricing	Page 4
04	**Scientific research, computational analysis, and publication** A documented path from scientific questions to interpretable results.	Starting at $5,000 per engagement	Page 5
05	**Scientific AI assurance and adversarial evaluation** A bounded review of scientific model behavior, reliability, and oversight.	Starting at $10,000 per engagement	Page 6
06	**Venture strategy, funding, and commercialization** Opportunity assessment, funding proposal support, and execution planning.	Scope and pricing set by engagement	Page 7
07	**Digital accounting and financial workflows** Traceable reconciliations and reviewable financial reporting from transaction records.	Scope and pricing set by engagement	Page 8

WHO WE SUPPORT

We work with organizations that turn specialized knowledge, services, and analysis into practical outcomes.

Science, research, and technology

Research groups, science-driven ventures, biotech and AI startups, university spinouts, and teams that depend on reliable digital systems and evidence.

Builders and independent operators

Construction businesses, contractors, and skilled-trade operators seeking clearer digital operations, customer communication, and practical technology.

Professional firms and analytical teams

Accounting and law firms, consultancies, quantitative teams, and other service organizations that need dependable infrastructure, workflow support, market intelligence, or financial data operations.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.

CAPABILITY 01 OF 7

Managed digital infrastructure and service operations

A standardized monthly foundation for small science, technology, consulting, and analytical teams. The base plan combines domain management, business email, a professional website, a customer dashboard, and ongoing support through one accountable service team. Customers may submit requests as needed; work is prioritized and delivered within the plan's monthly credits.

Starting at $500 per month

SCOPE OF WORK

- Domain portfolio review, DNS, setup, renewals, and hygiene
- Mobile-responsive professional website, contact forms, analytics, and basic SEO
- Vendor and license charges billed separately at cost with customer approval
- Business email setup, authentication, user and group administration
- Dashboard visibility into requests, deliverables, timelines, and status
- Out-of-scope work requires approval before additional billing

APPLICATIONS

Domain management, professional email, responsive websites, client request tracking, and monthly digital operations.

SCOPE NOTE

Included work is delivered within plan credits. Vendor and license costs or out-of-scope work require approval.

WORKFLOW

01
Set the operating scope

Review the team, digital assets, service priorities, and required access.

02
Prepare domains and email

Configure DNS, renewals, business email, authentication, and user access.

03
Build the public presence

Create or update a responsive website with agreed content and contact paths.

04
Connect requests and delivery

Organize requests, approvals, deliverables, and status in the customer workspace.

05
Maintain and improve

Prioritize support, routine updates, and approved work within the service plan.

SUGGESTED NAICS

- 518210 Data Processing, Hosting, and Related Services
- 541511 Custom Computer Programming Services
- 541519 Other Computer Related Services.

SUGGESTED PSC

- D302 IT Systems Development Services
- D307 IT Strategy and Architecture
- D399 Other IT and Telecommunications Services.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.

CAPABILITY 02 OF 7

Digital systems, applications, and automation

Broader infrastructure engagements can extend the Base foundation with digital workspaces, custom web or mobile applications, system integrations, workflow automation, financial data operations, and ongoing technical coordination.

Scoped beyond the Base plan

SCOPE OF WORK

- Workspace configuration and team training
- Workflow automation and data operations
- Custom software and system integration
- Financial data reconciliation and reporting controls

APPLICATIONS

Connected workspaces, client applications, internal operations, and integrated workflows.

SCOPE NOTE

Systems, access, data handling, and human review responsibilities are agreed before implementation.

WORKFLOW

01 Map the workflow

Document the people, systems, inputs, and handoffs involved in the operation.

02 Define system requirements

Agree on user needs, integrations, access, and acceptance criteria.

03 Configure or build

Implement applications, integrations, and automations within the approved scope.

04 Validate with the team

Review expected behavior, data handling, exceptions, and usability.

05 Deploy and support

Document the system, transfer operating knowledge, and coordinate follow-up.

SUGGESTED NAICS

- 513210 Software Publishers
- 518210 Data Processing, Hosting, and Related Services
- 541511 Custom Computer Programming Services
- 541519 Other Computer Related Services.

SUGGESTED PSC

- D302 IT Systems Development Services
- D307 IT Strategy and Architecture
- D399 Other IT and Telecommunications Services.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.

CAPABILITY 03 OF 7

Market intelligence and venture assessment

Decision support for founders, operators, investors, and research-driven companies assessing markets and technology ventures. Work is scoped to the question, evidence, and decision context.

Inquire for pricing

SCOPE OF WORK

- Technology sector and market landscape research
- Patterns, organizational risk, and data analysis
- Decision briefs with sources, assumptions, and implications
- Company, portfolio, and opportunity assessment
- Strategic partnership and enterprise opportunity research

APPLICATIONS

Market entry, competitor research, opportunity assessment, and partnership planning.

SCOPE NOTE

Findings reflect available evidence and are not guarantees of commercial outcomes.

WORKFLOW

01 Frame the decision

Set the research question, decision context, and market boundaries.

02 Map the market

Identify relevant segments, organizations, technologies, and evidence sources.

03 Assess opportunities

Compare companies, ventures, partnerships, and commercial signals.

04 Analyze evidence and risk

Distinguish observed information from interpretation and assumptions.

05 Deliver decision support

Present sourced findings, implications, and material limitations.

SUGGESTED NAICS

- 541611 Administrative Management and General Management Consulting Services
- 541690 Other Scientific and Technical Consulting Services
- 541990 All Other Professional, Scientific, and Technical Services.

SUGGESTED PSC

B524, B529, and B544 Special Studies and Analysis, including mathematical/statistical, scientific data, and technology studies.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.

CAPABILITY 04 OF 7

Scientific research, computational analysis, and publication

Scientific research support combines computational methods, data analysis, interpretation, and research communication. Engagements are defined around the scientific question, available data, methods, and intended audience.

Starting at $5,000 per engagement

SCOPE OF WORK

- Scientific programming and reproducible analysis workflows
- Analytical reports, figures, and publication materials
- Projects in multi-omics, molecular dynamics, and public health
- Data curation, quality review, and interpretation
- Research publication and revision workflows

APPLICATIONS

Scientific analysis, data curation, publication materials, and research communication.

SCOPE NOTE

Methods and conclusions are bounded by available data, data quality, and the agreed research scope.

WORKFLOW

01
Define the research question
Agree on objectives, available data, methods, and intended audience.

02
Prepare research data
Organize inputs and document data quality and handling requirements.

03
Run the analysis
Build and execute computational methods with reproducible records.

04
Review and interpret results
Check outputs, assumptions, and limitations against the evidence.

05
Communicate findings
Prepare reports, figures, papers, or publication materials for review.

SUGGESTED NAICS

- 541990 All Other Professional, Scientific, and Technical Services
- 541690 Other Scientific and Technical Consulting Services
- 541511 Custom Computer Programming Services.

SUGGESTED PSC

AJ11, AJ12, and AJ13 General Science and Technology Research and Development
B524, B529, and B544 scientific studies and analysis.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.

Guaynabo, PR 00968

CAPABILITY 05 OF 7

Scientific AI assurance and adversarial evaluation

Scoped adversarial assurance for scientific language models, co-scientist agents, evaluation harnesses, and sensitive research data systems. Testing is authorized, bounded, and reported for the teams responsible for risk decisions.

Starting at $10,000 per engagement

SCOPE OF WORK

- Scientific model and evaluation harness assessment
- Sensitive biological and chemical data workflow review
- Prioritized remediation guidance for scientific and security stakeholders
- Research agent and tool-access testing
- Threat scenarios and reproducible evidence

APPLICATIONS

Scientific models, research agents, evaluation controls, and sensitive data systems.

SCOPE NOTE

Testing is authorized and limited to the agreed systems, permissions, and methods.

WORKFLOW

01
Authorize and bound the work

Confirm systems, permissions, data classes, objectives, and exclusions.

02
Inventory the workflow

Document intended use, system components, tools, and human oversight.

03
Evaluate agreed requirements

Run controlled assessments within the approved environment and methods.

04
Record evidence

Document observations, reproducible results, scope, and limitations.

05
Prioritize remediation

Deliver findings and practical next steps to the responsible teams.

SUGGESTED NAICS

- 541690 Other Scientific and Technical Consulting Services
- 541511 Custom Computer Programming Services
- 541990 All Other Professional, Scientific, and Technical Services.

SUGGESTED PSC

B524, B529, and B544 scientific studies and analysis
AJ11 General Science and Technology R&D Services.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.

7 Calle Tabonuco Ste 105
Guaynabo, PR 00968

CAPABILITY 06 OF 7

Venture strategy, funding, and commercialization

Cross-disciplinary consulting helps teams turn scientific or technical opportunities into executable projects and commercial plans. Ozcorp can coordinate specialist collaborators when an engagement calls for expertise across business, research, and technology.

Scope and pricing set by engagement

SCOPE OF WORK

- Business planning and organizational assessment
- Project scoping and delivery coordination
- Enterprise and intellectual property opportunity support
- Funding opportunity and proposal development support
- Strategic partnerships and commercial development

APPLICATIONS

Business plans, funding proposals, strategic partnerships, and commercialization.

SCOPE NOTE

Funding and commercial outcomes are not guaranteed. Recommendations are scoped to client evidence and objectives.

WORKFLOW

01
Assess the opportunity
Clarify the venture, organizational needs, and intended outcomes.

02
Develop the business direction
Shape plans, operating priorities, and commercial assumptions.

03
Identify funding pathways
Review suitable funding opportunities and proposal requirements.

04
Build strategic relationships
Assess partnership, enterprise, and intellectual property opportunities.

05
Plan execution
Translate priorities into a scoped project plan and coordinated next steps.

SUGGESTED NAICS

541611 Administrative Management and General Management Consulting Services
541690 Other Scientific and Technical Consulting Services
541990 All Other Professional, Scientific, and Technical Services.

SUGGESTED PSC

B524, B529, and B544 studies and analysis, including mathematical/ statistical, scientific data, and technology studies.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.

Guaynabo, PR 00968

CAPABILITY 07 OF 7

Digital accounting and financial workflows

We design financial data processing workflows that connect source documents, transaction records, accounting policies, and reporting. The implementation is tailored to the client's systems, data, and review requirements.

Scope and pricing set by engagement

SCOPE OF WORK

- Bank statement and payment processor data ingestion, with OCR where suitable
- Exception reporting for unmatched items and missing documents
- Balance sheet, profit and loss, cash flow, and period-close reporting
- Bank, Stripe, and internal ledger transaction matching with defined date tolerances
- Configurable classifications, withholding tax, intercompany, and contract revenue rules
- Change history, backups, audit trails, and separation of processing, validation, and reporting

APPLICATIONS

Multi-bank reconciliation, investor and grantor reporting, funding applications, tax and audit preparation support, and contract reporting.

SCOPE NOTE

Automation supports, but does not replace, review by the client and qualified accounting or tax professionals.

WORKFLOW

01
Ingest and extract

Collect bank statements, payment processor records, and internal transaction data. Use optical character recognition, or OCR, to extract information from suitable documents and process sensitive inputs separately before review.

02
Reconcile and investigate

Match transactions across bank accounts, Stripe, and internal records using configured rules and date tolerances. Identify unmatched items, discrepancies, and missing documentation for review.

03
Apply accounting rules

Configure classifications and accounting policies for items such as withholding taxes, intercompany transfers, and contract revenue. Revenue recognition workflows can be designed around applicable generally accepted accounting principles and ASC 606, subject to professional review.

04
Prepare financial reports

Organize reconciled information for balance sheets, profit and loss statements, cash flow statements, and period-end closing. Maintain links to supporting transactions and documents for review.

05
Protect and trace changes

Design ledger controls, change histories, backups, recovery procedures, and separation of processing, validation, and reporting responsibilities. Immutable records and access controls can be specified where appropriate.

SUGGESTED NAICS

- 541511 Custom Computer Programming Services
- 541519 Other Computer Related Services
- 541611 Administrative Management and General Management Consulting Services
- 541990 All Other Professional, Scientific, and Technical Services.

SUGGESTED PSC

B524, B529, and B544 studies and analysis.

Define your engagement

Describe the opportunity, available evidence, and intended outcome to scope research, business planning, or specialist coordination.
